

Fisherman Engineering

Brand exploration v0.1

Premium engineering identity for software, systems, automotive safety, and robotics safety.

Core idea

Engineered judgement for machines that move.

Subtle navigation metaphor, strong safety signal, minimal fishing symbolism.

Two color routes

Choose the future-facing tone

A. Signal Safety

Deep navy + safety orange

Feels decisive, premium, functional-safety native.

Fisherman Engineering

Independent safety engineering for autonomous systems

CONTACT

#0B1F33

Navy

#FF6B1A

Orange

#5B6673

Slate

#F4F7FA

Ice

- Best if you want to look like a serious safety partner.
- Orange creates strong calls-to-action and audit markers.
- Works well for automotive, robotics, and industrial automation.

E. Maritime Systems

Maritime blue + technical silver

Feels calmer, more refined, less aggressive.

Fisherman Engineering

Systems safety for mobile machines and robotics

CAPABILITIES

#0A2A43

Deep

#146C94

Blue

#B8C4CC

Silver

#19B7C6

Aqua

- Best if you want calmer consulting authority.
- Silver adds technical hardware / robotics feel.
- Needs a second accent to avoid becoming too corporate-blue.

Recommendation: Use Route A as the primary identity. Borrow Route E silver/steel as secondary technical neutrals.

Route A - Signal Safety

Primary recommendation

Fisherman Engineering

Safety-critical software and systems consultancy

A strong, premium, audit-ready identity for companies building machines that move.

BOOK A REVIEW

#0B1F33

Deep Navy

#FF6B1A

Safety Orange

#17212B

Graphite

#5B6673

Slate

#F4F7FA

Ice

#FFFFFF

White

How it behaves

For headers

Use navy blocks, thin grid lines, orange for the one important action.

For safety work

Orange can mark checkpoints, hazards, trace links, and review gates.

For robotics

Use dark technical backgrounds and sparse diagrams; avoid playful robot visuals.

Route E - Maritime Systems

Alternative route

Fisherman Engineering

Robotics safety, systems assurance, and technical navigation

A calmer consulting authority with a subtle maritime and hardware engineering feel.

Deep Maritime

#146C94

Systems Blue

#B8C4CC

Technical Silver

#D9E2E8

Steel Mist

#19B7C6

Aqua Signal

#FFFFFF

White

How it behaves

For premium consulting

Feels less start-up and more calm European engineering authority.

For robotics

Silver and aqua can suggest sensors, autonomy, and hardware systems.

Risk

Too much blue/silver may look generic unless the FE mark is distinctive.

Logo concept families

Not literal fishing - technical, minimal, safety-oriented

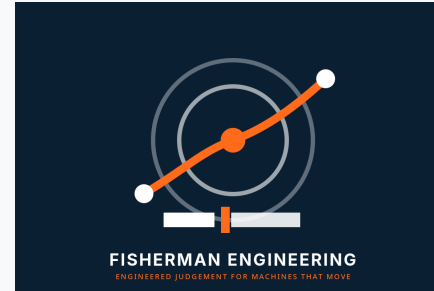

FE Signal Monogram

Best primary mark. Premium, clear, scalable.

FE Safety Shield

Most safety-specific. Use for safety practice / badge.

Abstract Path

Most robotics/navigation. Use for hero graphics.

Horizontal Wordmark

Best for website header, invoices, signatures.

Recommended brand architecture

PRIMARY BRAND	Fisherman Engineering
PRACTICE LABEL	FE Safety Engineering
DESCRIPTOR	Automotive Safety Robotics Safety Systems Consulting

Typography, headers, and components

Simple system for website, decks, proposals

Display font

Space Grotesk

Use for headlines, hero text, section titles.

Body font

Inter

Use for proposals, case studies, website content.

Technical font

IBM Plex Mono

Use for IDs, requirements, audits, diagrams.

Robotics Safety for Autonomous Systems

Hazard analysis, safety requirements, verification strategy, and architecture review.

CAPABILITIES

FE-SAFETY-001

Functional safety review package

Deliverables: item definition, HARA support, TSR/SR structure, safety plan, review notes.

Design brief draft

Working direction to refine next

POSITIONING

A premium independent consultancy for companies building safety-critical software, mobile machines, and robotics systems.

PERSONALITY

Precise, calm, technically authoritative, future-facing. More European engineering authority than playful marine brand.

VISUAL PRINCIPLES

Dark technical fields, precise grid, sparse geometry, one signal accent, minimal metaphors. Fishing is allowed only as a hidden origin story, not as the main visual language.

LOGO RECOMMENDATION

Use the FE Signal Monogram as the primary mark. Use the Shield variant as a practice badge for safety work. Use Abstract Path as a secondary graphic motif.

COLOR RECOMMENDATION

Choose Route A as primary: deep navy plus safety orange. Add Route E silver/steel as neutrals for robotics/hardware pages.

HEADER STYLE

Large confident statements on navy. Orange marks the one key action. Use monospaced labels for requirements, audits, and safety artifacts.

NAMING SYSTEM

Primary public name: Fisherman Engineering. Short practice label: FE Safety Engineering. Legal name appears in footers/contracts as Fisherman Engineering SRL.

Next decision

Pick primary route: A Signal Safety, E Maritime Systems, or hybrid A+E. Then I can produce a final brand book and cleaned logo package.
